

Sky Glove

The Sky

What's up in the sky?
What's so way up high?
The sun that shines so bright.
The moon for evening light.
The planets and each star
Seem so very far
I see clouds float by
That's what's in the sky.

What Would I See?

If I stood on Earth and looked up high,
What could I see in the sky?
The Sun. Its hot! Repeat question.
A star. They're bright. Repeat question.
A rocket ship. Zoom. Fast!
The Moon. At night.

Way Up High

Way up high, in the sky. Stars shining.
Number, number one, number two, number
three
Number four, number five - Way up high
In the sky, in sky. Way up high. In the sky.

Tell Me

Tell me the word about the sky
I'll give you a rhyme and you tell me the word
To light the day and heat everyone
Look in the sky; you'll see the sun
These carry thunder, which can be loud
They're usually white and fluffy cloud
Very late in the afternoon
The sun goes down; up comes the moon
These points of light are very far
Always wish upon a star

These Little Stars of Mine

This little star of mine, I'm gonna let it shine
(3x)
Let it shine, let it shine, let it shine.
This first star of mine, I'm gonna let it shine.
This second star of mine, I'm gonna let it shine
This third and fourth star of mine,
I'm gonna let 'em shine
This fifth star of mine is gonna shine
This hot pink star of mine, I'm gonna let it shine
This orange star of mine, I'm gonna let it shine
This purple and this orange star,
I'm gonna let 'em shine
This light pink star is gonna shine
These little stars of mine are gonna twinkle for
you
These little stars of mine are gonna make you
smile
These little stars of mine are gonna light up the
sky
These stars are gonna light up the sky
So let 'em shine, let 'em shine, let 'em shine!
